How WELDING — *makes Better Equipment*

The simple design and jointless construction of this brewing kettle were made possible by oxy-acetylene welding. Welding eliminates all crevices, cracks or other tiny openings generally present in jointed construction and thus removes the possibility of bacteria lodging in such places. This

welded kettle, being jointless, is permanently leak-proof. It is easy to clean and keep clean. In addition, welding has trimmed off the dead weight of the heavier connections required by other methods of joining metals.

Tomorrow's engineers will be expected to know how to take advantage of this modern metalworking process. Several valuable and interesting technical booklets, which describe the application of the oxy-acetylene process of welding and cutting to design, construction and fabrication, are available from Linde offices in principal cities. Write to The Linde Air Products Company, Unit of Union Carbide and Carbon Corporation, 30 East 42nd Street, New York, N. Y.

Everything for Oxy-Acetylene Welding and Cutting

LINDE OXYGEN • PREST-O-LITE ACETYLENE • OXWELD APPARATUS AND SUPPLIES
